EDUCATION

Augsburg University

Minneapolis, MN

Bachelor of Arts in Computer Science, Emphasis in Physics, Minor in Statistics

December 2026

- *Relevant Coursework:* Data Structures & Algorithms, Statistical Modeling, Statistical Analysis, Software Design and Development, Object-Oriented Programming in C++, Discrete Structures, Machine Learning, Programming for Data Science

EXPERIENCE

Federal Reserve Bank of Minneapolis

Minneapolis, MN

Technology Intern

May 2023 – Nov. 2025

- Developed and deployed custom Grafana alerting templates using Terraform, strengthening monitoring for 12+ internal teams.
- Contributed to DevOps workflows including infrastructure-as-code scripting and CI/CD optimization.
- Conducted troubleshooting to resolve IT-related application and desktop issues for 600+ internal customers.
- Collaborated with cross-functional teams to support IT initiatives, balancing technical expertise with clear, user-friendly communication.

Wells Fargo

Minneapolis, MN

Bank Teller

Nov. 2024 – May 2025

- Processed financial transactions with precision while upholding regulatory compliance, contributing to improved customer satisfaction and operational efficiency at the branch.
- Delivered exceptional customer service by assisting 50+ clients daily, resolving account inquiries and building trust through clear, empathetic communication.
- Promoted and cross-sold Wells Fargo banking products, contributing to a 15% increase in new account openings.
- Recognized for exceeding monthly service goals, maintaining a customer satisfaction rating of 95%+ based on client feedback surveys.

Minneapolis College

Minneapolis, MN

College Tutor

Oct. 2023 – Mar. 2024

- Provided one-on-one tutoring sessions in Python, C++, Calculus and Microeconomics to 50+ students.
- Designed custom lesson plans and practice materials tailored to individual student needs to improve academic outcomes by 75%.
- Created and managed interactive activities to engage small groups of students to strengthen problem-solving abilities for STEM students.
- Improved a quarterly review system of the tutoring curriculum, incorporating student feedback that led to process revisions.

PROJECTS

Housing Price Prediction | *Python, XGBoost, scikit-learn, Plotly, FastAPI*

- Developed regression model predicting real estate prices using location and property features.
- Scraped and cleaned 50K+ property listings with temporal and spatial feature engineering.
- Built interactive web interface for users to estimate home values in real-time.

Drug Interaction Checker | *Python, GNNs, RDKit, Neo4j, FastAPI*

- Developed graph-based model predicting adverse drug-drug interactions.
- Represented medications and biological pathways as knowledge graph structure.
- Flagged potentially harmful interactions missed by traditional rule-based systems.

TECHNICAL SKILLS

Languages: Java, Python, Terraform, C++, Go, SQL, R, JavaScript, HTML/CSS

Frameworks: React, Node.js, Flask, JUnit, FastAPI, PyTorch, TensorFlow, XGBoost, Keras

Developer Tools: Git, Grafana, Docker, CI/CD, AWS

Libraries: pandas, NumPy, Matplotlib, scikit-learn
